Professional Summary

this frontend developer is adept at creating user-friendly and responsive web apps. with a portfolio of projects that includes interactive games, weather apps, expense trackers, and password With a solid background in HTML5, CSS3, JavaScript (ES6+), React.js, and Tailwind CSS, generators. Skilled in UI/UX design principles, REST API integration, and performance optimization. finished industrial training at Banaras Locomotive Works (BLW), Varanasi, where they learned about CNC programming/production planning, locomotive technical software (LTS), and enterprise data processing (EDP). currently has a CGPA of 7.52/10 while working toward a B.Tech in Computer Science & Engineering.

Technical Skills

- **Languages/Frameworks:** Next.js, Redux, React.js, and JavaScript (ES6+)
- Frontend tools include HTML5, CSS3, Tailwind CSS, Bootstrap, and Sass.
- **Additional Proficiencies:** Agile Development, Git/GitHub, REST API Integration, and Responsive Web Design
- VS Code, npm, Postman, and Netlify are developer tools.

CERTIFICATIONS

- Self-Presentation (August 2025)
- Node.Js (August 2025)
- Undershanding by Creating a Simple React App from Scratch (June 2025)
- Javascript (June 2025)
- Python Programming Language Basics (June 2025)

Projects

- **Password Generator App:** Using React Hooks, a password generator with length, capital, numeric, and symbol options was created. The URL is <http://cozy-cendol-562a1f.netlify.app>
- **To-Do List App:** Developed a responsive to-do list with theme switching, persistent state, and add/delete capabilities.
The URL is <http://fluffy-treacle-e94037.netlify.app>
- **Expense Tracker App:** This React-based app lets users classify and view their spending through dynamic charts. Link:

- **Weather App:** Incorporated a public weather API to show current weather and forecasts in a clear user interface. Link:
- **Currency Converter App:** Using a third-party API, this app implemented real-time currency conversion with a responsive user interface and error handling. Link:
- **Quiz App:** Using React state management, a multiple-choice quiz app with dynamic scoring and progress tracking was developed. The link is
- **Tic-Tac-Toe:** Using React, a classic two-player game with replay and win detection features was created. The link is

Education

- B.Tech in Engineering and Computer Science (Appearing), Sir Chhotu Ram Institute of Engineering and Technology, Meerut
- Highest Semester SGPA: 8.0/10 | Present CGPA: 7.52/10 .
- **Class 12: 81.2%** Puspnagar, Azamgarh's Shiv Shankar Ji Intermediate College.
- **Class 10: 80%** Sikraur Sahbari, Azamgarh's Shri Mahadev Inter College.

Additional Information

completed an industrial training program at **Banaras Locomotive Works (BLW), Varanasi**, where they learned about **CNC programming/production planning, locomotive technical software (LTS)**, and **enterprise data processing (EDP)** from June to July of 2024.
